

Pala-Tech™ LABORATORIES

The Science of Palatability™

Every product is supported with our unique 100% Palatability Acceptance guarantee. The guarantee is simple: If a pet does not readily consume a Pala-Tech product, the company will willingly replace the product free of charge.

Therefore, there is NO RISK to using a Pala-Tech formulation with dogs, cats or horses...Pala-Tech guarantees the pet owner's satisfaction.

Pala-Tech is focused on the development of beneficial product formulations for use in companion animals...dogs, cats and horses.

Company Mission

Pala-Tech Laboratories mission is to develop innovative, high quality palatable formulations for veterinary practitioners to routinely use for the health care and well being of companion animals. Pala-Tech will only sell our products to licensed veterinarians so the products are used in accordance with a valid veterinarian-client-patient relationship. The pet's veterinarian is the most qualified individual to determine what is necessary for the optimum health of the animal.

Product Ingredients & Manufacturing

Every Pala-Tech product is formulated using the highest quality ingredients at the necessary levels for maximum clinical benefit. All ingredients used in manufacturing are human pharmaceutical or human food grade quality. There are no animal by-products used in the manufacture of our palatable formulations. Each product has been tested to be safe and highly effective.

Pala-Tech products are manufactured in the United States of America and Canada in FDA-approved, state-of-the art manufacturing facilities that follow current Good Manufacturing Practice guidelines (cGMP's). This ensures batch-to-batch consistency and a high level of quality control during each step of the manufacturing process. The end result is products veterinarians can trust to confidently use routinely with patients in their day-to-day veterinary practice.

Pala-Tech™ LABORATORIES

The Science of Palatability™

FELINE
CANINE
EQUINE

Pala-Tech Laboratories, Inc. was founded in 1999 on the principle of **palatable technology**. This technology uses proprietary flavor bases for each species, which are incorporated into every palatable product to ensure pets will readily consume the product free choice when administered. Every product is researched and developed to provide value to veterinarians and pet owners for:

- ✓ Improved dosing compliance
- ✓ Consumption of the entire prescribed dose
- ✓ Eliminating the extra cost and unhealthy calories associated with "hiding" medications
- ✓ Strengthening and enjoyment of the human-animal bond
- ✓ Higher probability of a successful clinical outcome

Pala-Tech will use the "science of palatability" to continue developing high quality, palatable dosage forms exclusively for the veterinary practitioner.

Automatic Coverage

- This guarantee is automatically in effect for every Pala-Tech product.
- Products are obtained directly from licensed veterinarians only.
- Products are administered to the patient according to the veterinarian's prescribed directions.
- Products are stored according to label recommendations.

Simple Terms

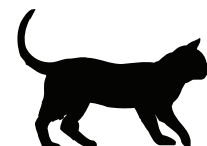

- In the unlikely event a patient will not readily consume a palatable Pala-Tech product, we will replace the product free of charge.¹
 - Return the product to the authorized Veterinary Distributor from whom it was purchased. The Distributor will replace the product to you at no charge.
- ¹ Product replaced will be the same brand unless otherwise specified by the veterinary clinic.

100% Palatability Acceptance

- Satisfaction guaranteed with each and every Pala-Tech product.
- If you have a patient in your practice that qualifies for this guarantee, please contact Pala-Tech Laboratories toll free at 1-888-337-2446 or your authorized Pala-Tech Veterinary Distributor.

Palatable Products

If you have an idea or suggestion for a palatable product, please contact our office. Pala-Tech is prepared to develop and market new and innovative products based on customer input and market demand. Let us know how we can help you and your patients.
